

Coming Home **A Filmmaker's Search For Reincarnation**

1 X 100 | FEATURE LENGTH DOCUMENTARY | ACQUISITION

COMING HOME - A FILMMAKER'S SEARCH FOR REINCARNATION is an independently produced feature length documentary dealing with the fascinating issues surrounding this controversial subject.

Producer **VLADIMIR KABELIK** investigates and analyzes cases of reincarnation in Canada, based on his personal belief... "If reincarnation really exists, we should not have to travel to Tibet, Sri Lanka or India but should be able find similar cases in own neighborhood."

Ordinary Canadians give fascinating personal testimonials about their near-death experiences, out of body experiences, strange repetitive dreams and finally - past life memories.

Canadians and U.S specialists discuss the principals of trance, hypnosis and other forms of psychotherapeutic and psychiatric research in this remarkable field. Also leaders of the world's major religions, historians, philosophers and writers describe the role of reincarnation, as it relates to them, and debate its possible existence.

Aimed at the thinking individual, **COMING HOME** provides one of the most in-depth analysis of the reincarnation phenomena ever produced for television.
